

CHAWTON GLOBAL EQUITY INCOME FUND

28 June 2024

CHAWTON
GLOBAL INVESTORS

Investment Objective

The Fund aims to provide a growing income stream and to grow capital over the long term (5 years or more). Each part of this objective will have equal weighting.

Investment Manager

The Fund Investment Manager, Michael Crawford, successfully managed a global equity fund at a large U.S. multi-family office, doubling its value over 7 years to over \$6 billion. He has 26 years' experience and was previously a member of the very successful Deutsche Asset Management team.

Investment Philosophy

The fund will be at least 80% invested in global equities. The Investment Manager will invest in a select (typically 20-50 holdings) portfolio of companies that exhibit high and sustainable returns on capital allowing the companies to both reinvest in the business for growth and provide a meaningful and growing dividend stream to be paid over time. In order to maximise the opportunity of identifying such companies, the Fund will invest in listed equities globally. The Manager believes that to sustain high returns over the long term, companies must adhere to responsible and sustainable investment principles.

Cumulative Performance

Cumulative performance	3 Months	6 Months	1 Year	3 Year	5 Year	Since Launch*
WS Chawton Global Equity Income Fund B Acc GBP	0.7%	8.7%	17.2%	19.9%	57.0%	62.8%

Past performance is not a reliable indicator of future results. The value of your investments and income derived can go down and you may not get back the money you invested. *21 May 2019

Commentary

The fund rose by 1.52% in June and has risen 17.2% over one year. Since inception, the fund has risen by 62.8%, outperforming the IA Global Equity Income Sector. In June we exited our position in Renishaw, an engineering company with core skills in metrology, motion control and precision machining. In our view, it is unlikely that the company's new product development initiatives in additive manufacturing and in the use of Raman spectroscopy in semiconductor manufacturing will be commercialised to the extent necessary to offset declining growth rates in their core business which is maturing and seeing increased competition from Chinese companies. Further, we exited our position in Johnson & Johnson after concluding through our monitoring processes that the company will struggle to meet our growth objectives. During the month we further built our position in KLA Corporation which we initiated in May.

The company provides advanced metrology equipment to the semiconductor industry which in our view is in the early innings of a long-term structural growth phase. We believe that its technology leadership and dominance of the Process Control segment of the market will enable the company to benefit from a progressively higher process control intensity associated with the design and manufacture of advanced logic and memory chips.

During the month, we visited ASML's headquarters in Veldhoven, Netherlands, to meet management and tour the plant. ASML is the sole supplier of advanced lithography machines used to make leading edge semiconductor chips. We discussed the company's long-term technology roadmap. Management are confident they can continue to reduce the pattern size and therefore increase transistor density on chips through to at least 2039.

Risks: As a concentrated equity portfolio of typically less than 50 stocks the fund may involve higher volatility and therefore higher risk for those with shorter term investment time horizons (under 5 years). The value of an investment and the income from it can fall as well as rise as a result of market and currency movements and you may not get back the amount originally invested. You should therefore regard your investment as long term. Details of the risk factors are included in the fund's prospectus available at <https://www.waystone.com/waystone-fund-services-uk-limited/ws-chawton-investment-funds/>

Minimum Investments
