

# TB CHAWTON GLOBAL EQUITY INCOME FUND

## MAY 2022 FACTSHEET

All data as at 31 May 2022

### Investment Objective

The Fund aims to provide a growing income stream and to grow capital over the long term (5 years or more). Each part of this objective will have equal weighting.

### Investment Philosophy

The fund will be at least 80% invested in global equities. The Investment Manager will invest in a select (typically 20-50 holdings) portfolio of companies that exhibit high and sustainable returns on capital allowing the companies to both reinvest in the business for growth and provide a meaningful and growing dividend stream to be paid over time. In order to maximise the opportunity of identifying such companies, the Fund will invest in listed equities globally. The Manager believes that in order to sustain high returns over the long term, companies must adhere to responsible and sustainable investment principles.

## Risks

As a concentrated equity portfolio of typically less than 50 stocks the fund may involve higher volatility and therefore higher risk for those with shorter term investment time horizons (under 5 years). The value of an investment and the income from it can fall as well as rise as a result of market and currency movements and you may not get back the amount originally invested. You should therefore regard your investment as long term. Details of the risk factors are included in the fund's prospectus available at [www.tbaileyfs.co.uk/funds](http://www.tbaileyfs.co.uk/funds)

An interesting way of thinking about the valuation is to invert the forward PE ratio to get an earnings yield for the portfolio of 5% which compares favourably to current yields from cash and bonds. In addition, the companies held in the fund should be able to increase prices in line with inflation in which case capital value and income are likely to be preserved in real terms (but see risk warnings above). Returns are then further augmented by growth from reinvestment of earnings not distributed.
